WEIGHT

Advantages of AquaMORE+:

- Accelerates growth rates, enabling the attainment of maximum sizes.
- Supports cellular and metabolic functions in shrimp.
- Enhances the physiological activity of shrimp.
- Contributes to an increase in the body weight of shrimp.
- Improves feed conversion rates and survival rates.
- Enhances the ability of shrimp to withstand stress.
- Boosts the immunological system, thereby reducing mortality.

AquaMORE+ combines bio-meal with biochemical precursors to offer comprehensive cellular nutrition, promoting improved growth performance in shrimp. This innovative blend reduces digestive upsets, enhances survival, stress resistance, disease resistance, and reproduction. By curbing the activity of harmful pathogenic bacteria in the gut, AquaMORE+ fosters a healthy and balanced gut microflora. Furthermore, it provides all essential nutrients, closely aligning with the recommended dietary requirements for shrimp.

AquaMORE+ comprises a synergistic blend of essential components, including Trace Minerals Premix, Vitamins Premix, Essential Nutrients and Oils, Bioactive Compounds, Highly Digestible Proteins, Essential Long Chain Fatty Acids, Essential Amino Acids, and Secondary Metabolites. This comprehensive formulation aims to optimize the nutritional profile for aquatic organisms, promoting their health, growth, and overall well-being.
